EXPERIENCE

End User Architect   March 2018 – Present
CI Investments   Toronto, ON
Currently involved in all major IT projects and initiatives, supporting end users across the organization. Responsibilities include, understanding the issue, reached solutions, installation, testing, proof of concept and documentation
Key Accomplishments:
- Project lead on company wide initiative to integrate and upgrade all boardrooms to Microsoft Teams Meeting Room.

- Contributed to the upgrading efforts to migrate all users to Windows 10. Project included the build of all desktops/laptops and automating a system to move user information to the new device.

Microsoft Cloud Services   December 2016 – March 2018
CI Investments   Toronto, ON

Responsible for migrating all users (both corporate and branch employees) to Office 365. We also configured Azure and introduced Skype, Teams, Intune and OneDrive to the business.
Key Accomplishments:

- We developed and application that assisted with the migration. Users were able to schedule a time a date to be migrated, then during the migration they were able to see the status. This application included the use of JavaScript, HTML, CSS, PHP, PowerShell and SQL Database

Production Support   May 2013 – December 2016
CI Investments   Toronto, ON

Responsible for support of all Windows Servers including maintenance/patching and providing third tier support for all internal and external applications.
Key Accomplishments:

- Technical lead for all mail flow products such as Microsoft Exchange, Cisco IronPort and AirWatch(MDM)
- Member of the Disaster Recovery team that was responsible for recovering all Windows servers and applications in the event of a disaster scenario
